A deck of similar cards about various topics will circulate through the class.

When your turn comes, quickly choose one card and keep it with you. **You will comment on how this aspect of your life has evolved due to your particular study path and say what your plans for the future are.**

For next week, send me a short recording (30 seconds) of yourself naturally speaking about this.

 Make sure to **use the right tenses** when talking about the past, the present and the future.
